

# Eye health in Canada: An invisible crisis

**The good news: vision loss can be prevented or treated in 75% of cases.**

**Making eye health, vision care and rehabilitation services a population health priority requires meaningful federal support.**

## What leadership looks like:

An evidence-based strategy supported by a vision desk

Increased research funding

A consistent and reliable supply of medication required to treat eye disease and/or conditions

Enhanced access to care for Indigenous peoples and priority populations

Funding to support eye health awareness

**Save our sight. Make vision health a priority for all Canadians.**
